ALTEC

**Aluminium
Wheelchair
Access Ramps**

ALTEC GmbH Singen

ALTEC GMBH

An innovative company from an innovative country.

Altec is a well established, medium sized manufacturing company situated in the south of Baden-Württemberg close to Lake Konstanz and the Swiss border.

A perfect environment to put ideas in action.

For every situation there is a correct solution

Only Altec has a product range wide enough to suit most

applications. If you can't find what you need we will design and manufacture the best solution for you.

At Altec we believe the most important factors are experience, cost and safety. All of our products are certified agree with the rules laid down by our chamber of commerce.

From design to production we offer top quality, **made in Germany!**

Please take the following into consideration.

To determine the right loading ramp following dimensions are required.

rear – door

A _____ mm
B _____ mm
C _____ mm
D _____ mm
E _____ mm

side – door

Q _____ mm
R _____ mm
S _____ mm
T _____ mm

Please consider the following:

With equal step dimensions, it's enough to mention quantity and dimension.

In case of longer treads with Unequal steps, pls. extend drawing.

Type SBA

This two part threshold ramp can be used for different heights. They are lightweight and easy to handle. SBA bridge is not self supporting and must rest on the threshold.

The anti slip surface ensures safe use.

Order code	Type	Length (mm)	Width (mm)	Height (mm)	Capacity (kgs)	Weight (kgs)
307.10.000	SBA	600	700	15-60	500	7
307.10.001	SBA	600	1000	15-60	500	10

Other dimensions on request.

Type SBS

SBS bridge ramps are designed as standard to span door steps or thresholds up to 35 mm high and 120 mm wide. They are easy to handle, alternative dimensions are available on request.

Order code	Type	Length (mm)	Width (mm)	Height (mm)	Capacity (kgs)	Weight (kgs)
307.00.108	SBS	500	700	35	300	4

Use copy for inquiries.

Other dimensions on request.

Type SBK

SB-K entrance ramps have been designed to allow easy access over doorsteps. They have an anti-slip surface, and are maintenance free. The height difference (dimension “h”) is needed when ordering.

Order code	Type	Length (mm)	Width (mm)	Height (mm)	Capacity (kgs)	Weight (kgs)
307.00.110	SBK	500	1000	10- 70	300	9
307.00.111	SBK	650	1000	70-120	300	11

Other dimensions on request.

Use copy for inquiries.

Type BTR

The BTR is a two piece threshold ramp, allow easy access to outside areas.

The external section can be left in place, while the internal can be placed when required.

Order code	Type	Length (mm)		Width (mm)	Height difference (mm)		Capacity (kgs/pair)	Weight (kgs/ea)	
		L 1	L 2		a	b		L 1	L 2
307.66.000	BTR	400	800	750	20 - 50	70 - 125	300	5	13
307.66.001	BTR	500	800	750	50 - 90	120 - 155	300	6	13
307.66.002	BTR	400	1200	750	20 - 50	150 - 185	300	6	18
307.66.003	BTR	500	1200	750	50 - 90	180 - 215	300	6	18

dimensions.

a _____ mm

b _____ mm

c _____ mm

d _____ mm

door width _____ mm

Type ABS

This aluminium ramp offers an excellent balance between a very low weight and a high load capacity. Robust and easy to handle. These ramps are fabricated from an extruded profile which is cut to length and angled as required. With an internal width of 150 mm, and an overall width of 235 mm, these ramps are ideal for wheel chairs.

Their profile allows them to be stacked one inside the other for ease of storage, and the 45 mm high safety curbs on each side prevent any lateral slippage.

Order code	Type	Internal width (mm)	Length (mm)	External width (mm)	Capacity (kgs/pair)	Height difference 20 % gradient (mm)	Weight (kgs/ea)
082.00.004	ABS	150	1000	235	700	165	5
082.00.005	ABS	150	1500	235	600	265	6
082.00.001	ABS	150	2000	235	500	365	8
082.00.002	ABS	150	2500	235	400	465	10
082.00.003	ABS	150	3000	235	350	565	12

Type ABS-F

A folding version of the ABS is available for ease of storage and use.

Order code	Type	Length (mm)	Dimension (mm)		Internal width (mm)	External width (mm)	Capacity (kgs/pair)	Bed height 20 % gradient (mm)	Weight (kgs/ea)
082.55.005	ABS - F	1500	L 1	L 2	150	235	400	265	7
082.55.001	ABS - F	2000	1100	900	150	235	400	365	9
082.55.002	ABS - F	2500	1350	1150	150	235	350	465	11
082.55.003	ABS - F	3000	1600	1400	150	235	300	565	13

Type ABS-Z

In case of small luggage space, the three times foldable ABS ramps are an ideal solution.

They are fabricated from an extruded profile and offers an excellent balance between low weight and capacity. With an internal width of 150 mm, they are also ideal for wheelchairs with offset axles.

Other dimensions on request.

Order code	Type	Length (mm)	Dimension (mm)			Internal width (mm)	External width (mm)	Capacity (kgs/pair)	Bed height 20% gradient (mm)	Weight (kgs/ea)
			L 1	L 2	L 3					
082.66.001	ABS - Z	2035	850	650	535	150	235	400	370	9
082.66.002	ABS - Z	2785	1100	900	785	150	235	325	520	12
082.66.003	ABS - Z	3535	1350	1150	1035	150	235	250	670	14

Type RAS

The loading ramps, type RAS are fabricated From a high strength aluminium alloy. The running surface is covered with an anti-slip coating.

Order code	Type	Length (mm)	Height difference (mm)	Capacity (kgs)	Weight (kgs)
082.20.000	RAS	2000	365	380	8
082.20.001	RAS	2500	465	380	10
082.20.002	RAS	3000	565	360	12

Type RAS-F

A folding version of the ABS is available. For ease of storage and use.

Order code	Type	Length (mm)	L 1	L 2	Height difference 20% gradient (mm)	capacity (kgs/pair)	weight (kgs/ea)
082.10.002	RAS - F	2000	1100	900	365	300	9
082.10.000	RAS - F	2500	1350	1150	465	300	11
082.10.001	RAS - F	3000	1600	1400	565	280	13

Type RAS-W

These ramps can be permanently installed inside the vehicle. The ramps pivoting and sliding mechanism uses ball bearings for ease of use. During transport the ramps are maintained vertically inside the vehicle by the safety straps supplied. If required, the ramp surface can easily be renewed with an anti-slip adhesive.

Each pair of ramps is supplied With a mounting kit.
The complete set consists of:

- 1 pair of ramps
- 1 steel axle (length 1800 mm)
- 1 installation kit to fix the axle to the floor of the vehicle
- 2 safety straps to hold the ramps in vertical position.

Other dimensions on request.

Order code	Type	Length (mm)	L 1	L 2	Capacity (kgs)	Weight (kgs)
082.10.021	RAS - W	2000	1040	960	300	9
082.10.022	RAS - W	2400	1240	1160	300	11

Type RLK

This aluminium ramp is designed to allow for easy one man operation. The folding and unfolding of the ramp is made effortless by the use of gas struts to balance the weight of the ramp.

The ramp surface is fabricated from extruded aluminium profiles which are perforated and embossed to give a perfect anti-slip surface, and also allow rain and snow to disperse very easily. The light weight of the ramp allows most of the initial loading capacity of the vehicle

position by two latches, and mounting blocks are used to maintain the assembly rigid and prevent any vibration during transport.

Order code	Type	Length (mm)	Width (mm)	Height (mm)	Height difference (mm)		Capacity (kgs)	Weight (kgs)
					min. (15%)	max. (30%)		
084.00.014	RLK	1600	800	875	155	375	350	31
084.00.015	RLK	1600	1000	875	155	375	350	37
084.00.016	RLK	1800	800	980	185	435	350	33

View X

Type RLK-Z

Derived from the RRK ramp.
The RLK-Z is designed for use
in vehicles with a low roof
height.

Folding twice in three sections
the RLK-Z is made for easy in-
stallation and easy use.

Order code	Type	Length (mm)	Width (mm)	Height (mm)	Height difference (mm)		Capacity (kgs)	Weight (kgs)
					min. (15%)	max. (30%)		
086.00.001	RLK - Z	2200	825	805	235	535	350	41
086.00.002	RLK - Z	2400	825	875	265	595	350	43
086.00.003	RLK - Z	2700	825	980	315	695	350	47
086.00.004	RLK - Z	2900	825	1045	345	755	350	49

Other dimensions on request.

Other dimensions on request.

The RRD-ramp is rotatable inside and outside.

Type RRD

Another version of RLK-ramp is type RRD.

Basically the same ramp but with the facility to swivel back against the side panels of your van.

An optional locking latch is available to keep the unit in the swivelled position.

Order code	Type	Length (mm)	Width (mm)	Height (mm)	Height difference (mm)		Capacity (kgs)	Weight (kgs)
					min. (15%)	max. (30%)		
081.01.306	RRD	1800	800	1040	185	460	450	54

081.01.318	RRD	2800	800	1535	330	760	430	79

Type AOL-R

The wheelchair ramp AOL-R is made to bridge over stairs or high steps.

The surface is fabricated from extruded aluminium profiles which are perforated and embossed to give a perfect anti-slip surface and allow rain and snow to disperse very easily.

Order code	Type	Length (mm)	Width (mm)	Height difference (mm)		Capacity (kgs)	Weight (kgs)
				min. 15 %	max. 15 %		
081.00.800	AOL-R	1500	800 (+15)	270		400	21

081.00.805	AOL-R	4000	800 (+15)	770		400	50

Use copy for inquiries

Special solutions

How to calculate the required length

$$\text{Length} = \frac{\text{Height difference} \times 100}{\text{Gradient \%}}$$

Please note to following gradients:

– at public buildings	6%
– owner driver with bodily handicap	6%
– owner driver without bodily handicap	10%
– handicapped person, who will be assisted	20%
– electric wheelchair	20%

The lengths and height differences mentioned in this catalogue are recommended dimensions, based on situations where persons will be assisted

For electric wheelchairs pls. pay attention to operating instructions for max. gradient.
